HISPANIC REUNIFICATION CANON

From the Universal Monarchy and Iberian Union to Hispanidad, Patria Grande, Lusophony, and Iberofonía

"Hispanic" is used in the broad historical sense of the civilizations and political communities formed through the Iberian worlds.
Portuguese, Brazilian, Lusophone African, Asian, Indigenous, Black Atlantic, and Filipino traditions remain distinct; inclusion does not imply assent.

COMPOSITE UNITY → DISAGGREGATION → MEMORY → RIVAL REUNIFICATIONS

GOVERNING QUESTION

Which unity, constituted by which relations, centered where, and organized toward what project?

FIVE OPERATIVE MODES

⇢	RESTORATION	Reconstructs a previous synalogical order, or its governing identity of project, as the model of renewed unity.
➔	RECOMPOSITION	Organizes constituted political units into a new synalogical whole while preserving their recognizable identities.
⇢	TRANSFIGURATION	Transfers the material identity of unity from dynasty and sovereignty toward language, religion, law, literature, culture,
➔	REFOUNDATION	Reorganizes inherited historical materials as a new attributive whole under a new American, Indo-American, popular, socialist, anti-
⇢	REARTICULATION	Renews synalogical relations among independent parts without requiring one federation, state, or sovereign authority.

RELATIONS · EVIDENCE STANDARD

→	documented direct influence / reception
⇢	probable or actor-specific influence
⋯	shared climate / structural resemblance
↔	polemical opposition
➔	explicit or retrospective relation to lost unity

Direct arrows are restricted to mechanisms named in the dossier.
Gold operation paths classify what a project does; they are not influence claims.
A repeated author code marks distinct works or phases, not a duplicate person.

ENTITIES · UNITY

● major author ▭ book / essay ◇ periodical ⬢ institution / congress

I = predominantly isological similarity or shared identity
S = actual synalogical relations among parts
I→S = an attempt to turn shared identity into organized relations
Classify the work, speech, institution, or phase—not the author forever.

BUENO CONTROL

A1, A2, B1, and B2.4-B2.6 adapt the logical alternatives in España y América (2001).
B2.7 and B2.8 are controlled extensions for Lusophone and Iberophone materials; they are not Bueno's own numbered categories.
The early-modern prologue is a historical substrate outside the modern classification.

Vertical position is a logical alternative, not a moral ranking. Movement fields may cross bands where works perform different operations.
Red marks political rupture or documented polemical opposition. Gold marks reunification operations or explicit/retrospective memory—not causal influence.
Every plotted author and text has structured metadata; the gazetteer below restores micro-level regional coverage.
